

ABSTRACT OF THE DISCLOSURE

A method of transmitting data relating to a number of different categories, from a central location (A) to at least one remote receiver (C). The method comprises allocating a priority to the data to be transmitted in accordance with its category, the priorities defining a relationship between the different categories of the data; transmitting the data in a manner determined by the allocated priorities; monitoring the data to be transmitted to determine whether the data will be transmitted in a satisfactory manner; and, if necessary, changing the priority of any data which has not yet been transmitted so that it will be transmitted satisfactorily.
